INDUSTRIES

Superior Learning Outcomes via ICT and AV

Dear Teachers, IT Directors and Audio Visual Managers,

The effective delivery of your school's pedagogy can be massively enhanced through the application of easy to use technology. Teachers must be able to focus on their teaching - not how to use technology in the classroom.

This is the philosophy behind the Precision Industries (Pi) story.

In your classrooms the Pi team can refresh your old orange Sanyo data projectors from the Building Education Revolution with new projectors or interactive panels.

In your assembly hall or auditorium the team can design, install, commission and support your complete Audio Visual (AV) refit requirements.

In addition the team at Pi can assist you in helping you determine the right mix of classroom technology and strategy for all of your ICT requirements. This includes devices for staff and students (BYOD & One-to-One programs) for tablets, Chromebooks, laptops, servers, networking, wireless and beyond. From ICT design through to support - Pi is ready to assist you.

- How important is it to you and the school to finish AV work (to complete sign-off) during the holidays?
- Would you prefer a single source for all of your ICT and AV needs?
- Do you have existing IT or AV installed by other companies which need support and maintenance mid-term?

Installing and supporting technology to help your teachers deliver superior learning outcomes is what we do best. Pi is accredited to NSW Government - 888 ICT Hardware panel contract and the Australian Government - Mobile Panel.

Simply call Precision Industries on 1300 369 927 to discuss your school requirements.

Best regards from the Pi Team.

Please note: All Information and pricing is accurate at time of printing but these may change without notice.

Optional Height Adjustable Trolley

ViewSonic CDE6561T

INTRODUCING VIVI,
A USER-FRIENDLY WIRELESS SOLUTION,
BUILT SPECIFICALLY FOR EDUCATION.

Imagine walking into that 10am lecture or class, and automatically the system authenticates who you are, activates the technology in the room and loads the user interface to your smart device ready for you to start teaching and engaging with your students.

Imagine giving a presentation to your students and dynamically collaborating with them using a smart device from anywhere in the room.

Imagine your smart device as a natural extension to your creative thoughts and ideas with the ability to share those ideas creatively with your peers.

Imagine your ideas celebrated on a big display.

Imagine educators and students communicating and collaborating in more innovative ways that stimulate and encourage creative interactive thinking.

Transform any space into a creative interactive environment that supports creative thinking and facilitates the sharing of ideas quickly and easily.

Vivi is easy to use, cost effective and a simple mechanism to leverage cloud-based content and information. Pi's direct partner has developed Vivi in response to the growing need in education for a wireless collaboration tool.

C278
APPROVED

ET4L
APPROVED

The **Minamata Convention on Mercury**, which was adopted in October 2013, includes the **phase-out of mercury** use in products and processes.

By 2020, this United Nations global treaty will **permanently prohibit** the use of mercury in light sources.

As a forward-thinking and environmentally friendly company, CASIO led the charge by switching all projectors to the energy-efficient **laser and LED hybrid, mercury-free** light source developed by CASIO in 2010.

Refresh and Reveal a New Learning Solution

CASIO®

We're committed to keeping your school **ahead of the curve**, and with the ever changing interactive learning landscape, **by 2020 all projectors will be Lamp Free**. Don't buy **OLD mercury technology**, get ahead of the curve now with CASIO.

- Superior Technology and long term running costs, ask for TCO analysis
- Less than 5 seconds to power up for maximum brightness, and no cool down required
- Lowest total cost of ownership for any projector
 - o Up to 45% less power than a standard mercury projector
 - o NO lamp and filter replacement costs, no classroom downtime
 - o 20,000hrs light-source life (200 school days, 5hrs a day = 1000hrs) = 20 years usage
 - o Made In Japan
 - o Industry leading 5 years or 10,000hrs warranty

Public Address and Evacuation

Schools play a critical role in keeping students safe from harm. While the potential threat of a shooting or bombing is (thankfully) a rare occurrence in Australia, schools need to move toward a more appropriate form of securing their most important asset, their students and staff.

Pi have partnered with InterM to give your school and community the peace of mind and assurance that by the push of a button they can isolate a single building through to a full lock down of the entire school.

Pi can give schools the opportunity to implement a site-wide audible evacuation and lockdown system to safely manage the movement of staff and children onsite in the event of a crisis. This is not only in the case of a fire, but also in the face of a potential bomb or gunman threat.

Every school is assessed on an individual basis, their needs, current infrastructure and most importantly their budget. Pi offer custom designed, simple to operate systems that include voice paging to all common areas and classrooms, scheduled bells and emergency warning sounds.

Simply call Precision Industries on 1300 369 927 and speak to a Technology Solutions Executive to discuss your schools PA and Emergency Evacuation system requirements.

Video Walls

High-quality commercial-grade digital video wall solutions are ideal for engaging students and parents and add that wow factor to you school

BrightSign®

Delivering powerful performance and reliability, the BrightSign range is designed exclusively for digital signage. Utilising one of the industry's slimmest operating systems, the range delivers superior signage capabilities and exceptional 4K and Full HD video quality.

BrightSign offers True 4K and Full HD playback, 4K upscaling, dual video decoding, PoE+, HTML5, Live TV, live feeds, video walls, IP streaming, sign preview, remote snapshot, and a wide array of interactive options. With BrightSign, you get dynamic results without difficulty.

MagicInfo

Easy and Instant Content Management Solution

MagicInfo is a smart, intuitive content creation and management solution available standard on Samsung Display Solutions products. MagicInfo equips end-users with a suite of creative tools built to facilitate content creation and display management. You can perform a range of functions, from creating eye-catching digital signage to designing and managing a complex, interactive multimedia display system.

MagicInfo is composed of three innovative components that provide integrated, end-to-end content creation and management features:

MagicInfo Player is Samsung's powerful in-house media player.

MagicInfo Author allows you to custom build your digital signage using Samsung's professional design templates and script wizards.

MagicInfo Server enables administrators to remotely monitor, manage and schedule media content.

StratosMedia utilises ground breaking platforms and media technologies to deliver creative and interactive media content at the highest broadcast quality via a cloud based infrastructure with an outstanding user experience.

StratosMedia delivers a Better, Faster, Stronger digital experience for content creators, clients and viewers alike.

Scalable, reliable and robust, StratosMedia is a complete solution for the development, distribution, and on-going management of advanced digital content to multiple devices.

StratosMedia Software Applications Key Deliverables

Security | Multiple Users | Ultra-Fast Content Creation - Scheduling - Distribution | Hybrid Cloud Infrastructure | Asset Management | Data Integration | Analytics Management Tools & Reports | Players: Management & Scalability | Streaming Players: Chrome Management Console | Grab & Go - Hands Off to Mobile Devices

Start every meeting on time with crystal clear sound. With a range of flexible connectivity options to suit your needs.

All the conference call capabilities without the complexity. Collaboration as simple as it should be.

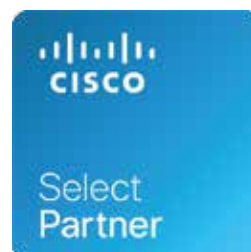

Polycom® RealPresence® Group 500

Precision Industries are pleased to announce a trade-in promotion and special offer specifically for the Polycom RealPresence Group Series.

Call us today to find out more.

Polycom RealPresence Group Series is the engine that drives enterprise-grade video, voice and collaboration experiences, accelerating decision-making and fostering innovation. Only Polycom delivers video collaboration experiences that bring users closer together and drive meaningful conversation for geographically dispersed teams.

Cisco TelePresence SX20 Quick Set

Create a Powerful,

Flexible Telepresence System

The Cisco TelePresence SX20 Quick Set is a flexible solution that helps you easily turn any flat panel display into a powerful telepresence system for small to medium-size meeting rooms. The SX20 Quick Set delivers high-definition video quality, multi-party conferencing, and three different camera options to accommodate room size and configurations - all at a value price.

The Next Generation of Array Microphones

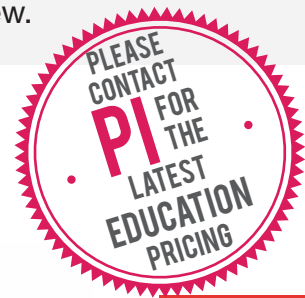

- ✓ **Wireless connection**
- ✓ **Echo cancellation**
- ✓ **Noise cancellation**
- ✓ **Portable travel case**
- ✓ **Better than Bluetooth!**

The magic in the Acoustic Magic Voice Tracker™ array microphone resides in the algorithms running on its internal DSP that enable it to form a listening beam and automatically and electronically steer that beam towards the active talker. This creates spatial filtering, which when combined with the 6 or 8 always on microphones in the array, create pickup ranges of 30 feet with a 360° field of view.

chromebox for Meetings

Meet with

anyone

on any device

Chromebox for meetings lets you connect with anyone, on any device, for more productive, collaborative meetings. With support for larger rooms, you can seamlessly equip larger spaces fitting up to 20 people with HD video meetings - plus, connect with 15 other participants on Google Hangouts - all for a fraction of the cost of legacy video conferencing systems.

Connect and Collaborate Securely

It's time to take cloud communications to the next level.

With **Cisco secure unified communications solutions**, people in any campus, branch, or remote workspace can securely connect and collaborate across a wide array of communications applications. These solutions integrate a comprehensive security strategy with a unified communications network to protect data and resources.

If you've been thinking about how to optimise your organisation's cloud communication and collaboration strategy, **Esna Cloudlink for Cisco** can help.

Esna Cloudlink for Cisco is a unique collaboration solution that integrates Cisco messaging and Jabber collaboration tools inside the business applications you use every day to get work done. Cloudlink for Cisco makes it easy for you to connect, communicate and collaborate with team members. With Cloudlink for Cisco you can make voice and video calls, send instant messages, check presence and manage your voice messages without having to login and out of different applications. Now you can stay in the applications you're already working in and communicate in real time.

Extend Video to the Cloud

Expanding the reach of video collaboration in **Office 365** and **Skype for Business**.

Success with UC is about integrating all communications into a seamless workflow that is easy to use. Polycom is the only Microsoft UC partner that provides direct integration with more than 40 voice, video, and content solutions that integrate with Skype for Business/Microsoft Lync, SharePoint, Exchange and Office 365.

MAINTENANCE AND SUPPORT

Pi Coverage

Installations, Commissioning and Support by the Pi in-house team

Coverage

Precision Industries (Pi) delivers complete AV and ICT solutions coupled with our electrical and communications skills as an integrated service.

Our company's head office is located in South West Sydney, NSW. We have dedicated offices in Canberra, Brisbane, Melbourne, Adelaide and Perth.

Technical expertise

At Pi we are proud of the technical depth and knowledge of our people, placing us at the forefront of industry when designing client focused solutions. Our commitment to invest in Research and Development is unrivalled, ensuring Pi solutions are tried and tested. Sustained investment in our research and development program is a key enabler for your success.

People

Pi recognises that its main asset is its people and therefore invests heavily in the development and retention of employees. Pi is looking to be considered by industry as an employer of choice.

Pi will continue to develop quality employees by providing in-house training and development programs so that employees are continually up-skilled in their respective fields of expertise.

Support

This includes installation, commissioning, support and maintenance. The Pi in-house team can respond to your specific KPI's/SLAs meaning you do not have to wait for urgent support requirements.

Pi Finance

We understand that it's important for your business to have ready access to finance so you're able to respond to opportunities that arise, or to meet planned and unplanned financial obligations.

Through Team Leasing and Capital Easy, you can arrange finance for computers, telephone equipment, copiers, software and more.

As vital as new equipment is to your business, equally important is financing it in a way that is efficient, tax effective, and maximises productivity. Team Leasing and Capital Easy will work with you to structure your lease to meet any special business cash flow requirements you have.

Financing solutions include:

- Rental/Operating Lease
- Finance Lease
- Chattel Mortgage
- Rent To Own
